Academic Background

Licentiate in Computer Engineering, emphasis in Software Development
ULACIT · Dec 2025 – Dec 2026

Bachelor's in Computer Engineering
ULACIT · Jan 2023 – Dec 2025

Technologies

Data Engineering

- Python (Pandas, NumPy, boto3)
- SQL
- ETL / ELT pipelines (RAW, curated, analytics)
- AWS Glue, Athena, Step Functions
- Apache Airflow
- Parquet, CSV, JSON
- Data quality validations

Cloud & Observability

- AWS (Lambda, S3, CloudWatch, SAM, CDK, EKS)
- Dynatrace
- Azure, Oracle Cloud (OCI)

AI / Machine Learning

- Amazon Bedrock (GenAI)
- Embeddings, RAG, LangChain
- AI agents
- scikit-learn

Analytics & Databases

- Power BI, Amazon QuickSight
- SQL Server, Oracle 19C DB, Firebase

Software Development

- .NET Core, C#, .NET MAUI, Java
- JavaScript, HTML, CSS

Professional Summary

AI Data Engineer specialized in AWS data pipelines, Generative AI and AI agents. I turn raw, multi-source data into reliable, AI-ready datasets for analytics and decision-making, with hands-on experience in an enterprise AI Center of Excellence. AWS Certified Solutions Architect – Associate.

Experience

NOVACOMP – Information Technology
San José, Costa Rica – July 2026 / October 2026
AI Data Engineer · Client: Aeroméxico – AI Center of Excellence

- Designed and maintained serverless data pipelines on AWS (Lambda, Glue, Athena, Step Functions, S3, Airflow) to ingest and transform data from APIs, databases and files across RAW, curated and analytics layers.
- Built AI-ready datasets and Generative AI solutions with Amazon Bedrock, embeddings and RAG.
- Contributed to the AI agent platform: agent registry integration with deployment pipelines and cost tracking per agent.
- Delivered cost-visibility dashboards, business metrics and forecasting models (Python, SQL, Pandas, scikit-learn).
- Implemented data quality validations, governance and tagging standards, and automated PDF/Excel reporting.
- Deployed application monitoring with Dynatrace on Amazon EKS (Fargate) and supported AWS infrastructure (KMS, VPC, subnets) with IaC (AWS SAM/CDK).

NOVACOMP – Information Technology
San José, Costa Rica – November 2025 / February 2026
Software Engineer / AWS Cloud

- Implemented and deployed solutions on AWS applying cloud architecture best practices.
- Automated infrastructure and services to improve availability and scalability.
- Supported the design of highly available, secure and cost-efficient solutions under a DevOps approach.

NOVACOMP – Information Technology
San José, Costa Rica – January 2025 / November 2025
Software Engineer (Back End and Front-End Developer)

- Analysis, design and development of an internal system to manage certifications of consulting staff.
- Back End development using .NET Core and RESTful API services; Front End support with HTML, CSS and JavaScript.
- Applied DevOps principles and Scrum methodology; continuous support to the talent management department.

- Services and REST APIs

DevOps & Methodologies

- GitHub, DevOps principles
- Scrum, Software Testing (QA)
- Linux, Ubuntu Server

Soft Skills

- Teamwork
- Assertive communication
- Proactivity

Languages

- Native Spanish
- Advanced English (TOEIC)

Certifications

- AWS Certified Solutions Architect – Associate
- AWS Certified Cloud Practitioner
- AWS Technical Essentials
- DevOps on AWS
- AWS Partner Accreditation (Technical)
- AWS Partner Generative AI Essentials
- Generative AI: Art of the Possible
- Introduction to Machine Learning: Art of the Possible
- Power BI + AI
- Scrum Fundamentals
- (ETS) TOEIC

Generative AI (GenAI) Projects

Virtual RAG Assistant for Corporate Knowledge Management

- Designed and implemented a semantic search system based on a RAG (Retrieval-Augmented Generation) architecture to automate queries over technical documentation and staff certifications.
- **Stack:** Python, AWS Bedrock (Anthropic Claude), LangChain, vector databases and .NET Core for RESTful API exposure.
- **Impact:** Reduced internal information retrieval time and optimized technical support workflows.

Smart User Story Generator (Scrum AI Assistant)

- Web application that turns raw business requirements into structured user stories and acceptance criteria using Large Language Models (LLMs).
- **Stack:** .NET Core, Python, OpenAI API / AWS Bedrock, HTML, CSS and JavaScript.

University Projects

Incident Mobile App: Mobile app for reporting campus incidents. C#, .NET MAUI, SQL, Firebase, Scrum.

Recreation of ULACIT Web System: Web replica of the university student system. .NET Core, SQL Server, APIs, Scrum, DevOps.

Enrollment System – Web Forms / API: Full CRUD for course and enrollment management. .NET Core, SQL Server, REST APIs.

Cash Register System: Store cash register management. C#, .NET Core, SQL Server, JavaScript.

Virtualization: Linux virtual machines on Ubuntu Server. Azure, Linux.

Armory: Weapon control web system. .NET Core, Oracle 19C DB, Oracle Cloud.

Billing Application: Billing program for a hardware store. Python, HTML, CSS.

Video Game: Spacecraft-based video game. Java, SQL Server.
