Academic Background

Bachelor's in computer engineering

ULACIT

Technologies

- .Net Maui
- .Net Core
- C#
- Java,
- JavaScript, HTML y CSS
- SQL
- Python
- Linux, Ubuntu Server
- Azure
- AWS Cloud
- Software Testing (QA)
- Oracle Cloud (OCI)
- SQL Server
- Oracle 19C DB
- Firebase
- GitHub
- Development of Services and APIS
- DevOps Principles
- Scrum Methodology

Soft Skills

- TeamWork
- Assertive communication
- Proactivity

Languages

- Native Spanish
- Advance English

Professional Objetive

Proactive professional focused on opportunities in the field of computer engineering, where I can apply my knowledge. My goal is to gain experience in a work environment where I can strengthen my technical skills and develop holistically, projecting myself as a professional capable of contributing innovative and effective solutions in the technological field

Experience

NOVACOMP- Information Technology
San Jose, Costa Rica – November 2025 / February 2026
Software Engineer / AWS Cloud

- Software Engineer with experience in Amazon Web Services (AWS) Cloud Architecture, service deployment, and infrastructure automation. Strong foundation in designing scalable, highly available, and secure solutions, applying DevOps principles and AWS architecture best practices. Oriented toward end-to-end solution design, cloud resource optimization, and collaboration with technical teams to deliver resilient and efficient systems.

NOVACOMP – Information Technology
San José, Costa Rica – January 2025 / November 2025
Software Engineer (Back End and Front-End Developer)

- Analysis, design, and development of an internal system to manage certifications of consulting staff.
- Back End development using .NET Core and RESTful API services.
- Support in Front End tasks for internal systems using HTML, CSS, and JavaScript.
- Application of DevOps principles and Scrum methodology for agile project management.
- Collaborative work with the development team and continuous support to the talent management department.

Generative AI (GenAI) Projects

Virtual RAG Assistant for Corporate Knowledge Management

- Designed and implemented a semantic search system leveraging a **RAG (Retrieval-Augmented Generation)** architecture to automate queries over technical documentation and staff certifications.
- **Stack:** Python, AWS Bedrock (Anthropic Claude), LangChain, Vector Databases, and .NET Core for RESTful API exposure.
- **Impact:** Reduced internal information retrieval time and optimized technical support workflows.

Smart User Story Generator (Scrum AI Assistant)

- Developed a web application focused on agile process automation, transforming raw business requirements into structured user stories and acceptance criteria using Large Language Models (LLMs).
- **Stack:** .NET Core, Python, OpenAI API / AWS Bedrock, HTML, CSS, and JavaScript.

Courses

- Scrum Fundamentals
- Power BI + IA

Certifications

- Scrum Fundamentals
- Power BI + IA
- (ETS) TOEIC
- AWS Certified Cloud Practitioner
- AWS Certified Solutions Architect – Associate
- AWS Technical Essentials
- DevOps on AWS
- Generative AI: Art of the Possible
- Introduction to Machine Learning: Art of the Possible
- AWS Partner Accreditation (Technical)
- AWS Partner Generative AI Essentials

Incident Mobile App (University Project)
Mobile application designed for reporting incidents occurring at the university.
Technologies used: C#, .Net Maui, SQL, JavaScript, HTML, CSS, Firebase as the database, Scrum methodology.

Centro Civico por la Paz, Heredia, Costa Rica (Community Service)
Administrative work and assisting with physical recreation activities for the Civic Center for Peace population.

Recreation of ULACIT Web System (University Project)
Web application replicating the university's student system.
Technologies used: .Net Core, SQL, SQL Server, JavaScript, HTML, CSS, APIs, Scrum methodology, and DevOps principles.

Enrollment System - Web Form Maintenance / API (University Project)
Web application assigning courses and enrollment statuses to students or professors. Developed the full CRUD functionality.
Technologies used: .Net Core, SQL, SQL Server, JavaScript, HTML, CSS, and API Development.

Cash Register System
Application for managing store cash registers. Technologies used: C#, .Net Core, SQL, SQL Server, JavaScript, HTML, CSS.

Virtualization (University Project)
Creation and configuration of virtual machines with a Linux operating system on an Ubuntu Server. Technologies used: Azure, Linux, Ubuntu Server.

Video Game (University Project)
Spacecraft-based video game. Technologies used: Java, SQL Server.

Armory (University Project)
Weapon control web system. Technologies used: .Net Core, SQL, Oracle 19C DB, Oracle Cloud.

Billing Application (University Project)
Billing program for a hardware store. Technologies used: Python, CSS, HTML.
